

**CDA NOTICES & DISCLAIMERS FOR CDM 25**  
**ATTENDEES PLEASE READ**

**CDA DISCLAIMER**

CDA does not endorse and is not responsible for any product, service, or representation made in any way by an attendee of the Convenience Distribution Business Exchange (CDBX). CDA shall not be liable or in any way responsible for any purchase of, use by, or claim relating to any such product, service or representation made at the CDBX.

CDA disclaims any responsibility or liability relating to any prohibited or unauthorized products such as, but not limited to, any actual or deemed tobacco products not authorized by the Federal government which may be marketed, sold, or bought by attendees at the CDBX. Any such illegal or unauthorized products shall not be marketed, sold, distributed, or bought at the CDBX and CDA will take appropriate corrective measures against any party breaching this directive.

**PROHIBITED OR UNAUTHORIZED PRODUCTS**

If you are buying or selling new tobacco products, including e-cigarettes and vaping products, which do not have a Marketing Grant Order; CBD products; or any New and Emerging Product such as Delta 8, Delta 10, Metatine, or any other similar product which is subject to Federal or any State Prohibition, Restriction, or adverse Regulation this notice applies to you.

Any buyer or seller participating in the 2024 Convenience Distribution Business Exchange (CDBX) is considered a sophisticated and knowledgeable buyer or seller. You are not allowed to market, promote, sell, or buy any such prohibited or unauthorized product at the CDBX. If CDA discovers that you are selling or buying such prohibited, restricted, or unauthorized products, CDA will require you to stop doing so.

## **CBD and EMERGING PRODUCTS**

**CDA particularly notes that without FDA authorization, no CBD or Emerging Product making any health or medical claim may be marketed, sold, distributed or bought at the CDBX.**

### **Marketing Granted Orders**

**Attendees are reminded that any manufacturer of any tobacco product, including, but not limited to, e-cigarettes, vape, e-liquids, and synthetic nicotine products, which does not have a Marketing Granted Order from the FDA runs a risk of adverse actions by, and potentially substantial financial penalties from, the FDA. If a manufacturer has submitted a Pre-Market Tobacco Application which has not been acted upon by the FDA for any reason, or remains under review by the FDA, according to the terms of the Tobacco Control Act, that manufacturer can and might be held to be illegally marketing that company's products. As noted above, CDA takes no responsibility for determining whether a product has an MGO.**

### **HEALTH CONSIDERATIONS**

**Contagious diseases are still rampant in the United States. If you have or have been exposed within the past 5 days to any serious transmittable disease such as covid, RSV, the flu, or measles, please do not attend the CDBX. CDA shall not be responsible or liable for any illness or attendant consequence due to a contagious disease. CDA shall follow all CDC and other federal, state, or local health guidelines in effect.**
